SOPHISTICATION VALUE OF PROJECT

Our app's UI is pretty much simple but the way it has been put together with all the linkings and functionalities was a tough job. It really required lots and lots of patience along with more tools and ways to figure out the way the features were plugged in. So in total our app is simple in and sophisticated in lookking with a vack-bendding Back-end.

In terms of Total Complexity of the Project, I will rate it as 3/5.
