NOVELTY OF THE PROJECT IDEA

Though the zone or scope of our project idea has been explored, but the very own implementation is unique. There are apps related to college fests but no one provides such integration where a person can be assigned different titles depending on the way they use our app. The features not only lets you to see the fest list and details but much more than just that. It has a potential to be a platform to promote fests and brong out sponsors too. The way of presenting it and the whole lot of features certainly give this project idea a lead.
